Volumizing Injections and Advanced Techniques for Facial Rejuvenation

PREFACE

The procedures of facial rejuvenation with hyaluronic acid-based filler have become, over the years, constantly more complex and elaborate. The introduction of new types of fillers with innovative rheological characteristics has noticeably broadened treatment options. Implant techniques using needles or cannulas with a higher and higher and safer performance allows the treatment of anatomical areas that years ago were not even taken into consideration. The treatment of these so-called “difficult” and “dangerous” zones has allowed for improvement in the outcome of facial rejuvenation overall.

A fundamental role in the evolution of filler use can be found in our greater knowledge of the anatomical bases that underlie the aging processes. Understanding the anatomy of the tissues present in the face (skin, fat compartments, ligaments and bones), and their modifications correlated with aging, allows a more purposeful and effective approach able to selectively correct the main flaws.

With this book I hope to make a contribution to summarizing the viable techniques with hyaluronic acid filler to obtain the best facial rejuvenation. There are chapters dedicated to treatments considered basic along with chapters where the most advanced inoculation techniques are described. We go from the treatment of simple surface skin wrinkles to creases in the face such as the periorcular wrinkles, the nasolabial and labiomental folds to treatment of the “difficult” zones such as the temples, midface, nose, the lower part of the face, etc., to give the most complete and exhaustive description possible of the principal techniques available.

Seeing film clips available online allows viewing the procedures described in the text, giving further understanding and insight into the injection procedures.

Salvatore Piero Fundarò

GENERAL INDEX

CHAPTER 1	
GENERAL IMPLANT TECHNIQUES	11
Hygiene and skin disinfection	12
Preservation and management of the materials	12
General implant techniques	13
Implant depth	13
Retrograde linear technique	15
Anterograde linear technique	15
Antero-retrograde linear technique	16
Fanning technique	16
Pyramid technique	17
Criss-cross or crosshatching technique	17
Serial puncture technique	18
Sandwich technique	18
Fern pattern technique	19
Perpendicular needle (or bolus) technique	19
Cannula technique	20
The rheological characteristics of fillers	21
CHAPTER 2	
ANESTHESIA TECHNIQUES	25
Patient evaluation and contraindications	26
Local anesthetics: structure and action mechanism	27
Topical anesthesia	28
Local infiltrative anesthesia	30
Perineural anesthesia (peripheral nerve block)	31
Infraorbital nerve block	32
Mental nerve block	33
Supraorbital nerve block	32
Adverse reactions and complications	34
CHAPTER 3	
FOREHEAD AND GLABELLA	37
Anatomy and aging	38
Pretreatment evaluation	42
Technique	43
Glabella	43
Forehead	44
Perpendicular needle (bolus) technique	45
Cannula technique	46
Complications	47

CHAPTER 4	
THE EYEBROW	49
Anatomy and aging	50
Pretreatment evaluation	53
Raising of eyebrow with linear technique	54
Volume increase of the eyebrow region with the fan technique	56
Correction of the head of the eyebrow	58
Complications	61
CHAPTER 5	
PERIOCCULAR WRINKLES	63
Periocular, zygomatic and cheek wrinkles	64
Pretreatment evaluation	66
Techniques	67
Periocular wrinkles	67
Complications	68
Correction of crow's feet	69
CHAPTER 6	
TEAR TROUGH AND LID/CHEEK JUNCTION	75
Anatomy and aging	76
Pretreatment evaluation	80
Tear trough technique	82
Needle technique	82
The microcannula technique	84
Correction of the tear trough	85
Lid/cheek junction	88
Correction of the lid/cheek junction	88
Needle technique	90
Microcannula technique	90
Complications	91
CHAPTER 7	
NOSE RESHAPING WITH FILLER	95
Anatomy	96
Nasal bones	96
Nasal cartilage	97
External structures	98
Skin of the nose	98
Nasal muscles	98
Vascularization of the nose	100
Pretreatment evaluation	101
Technique	104
Treatment with cannula	106
Complications	108

CHAPTER 8	
THE MIDFACE	111
Anatomy of fat compartments of midface	113
Superficial fat compartments	115
Deep fat compartments	116
Aging of fat compartments	117
Treatment planning	120
Injection technique	124
CHAPTER 9	
NASOLABIAL FOLD	131
Anatomy and aging	132
Pretreatment evaluation	136
Technique	137
Complications	139
CHAPTER 10	
TEMPLE	141
Anatomy and aging	142
Pretreatment evaluation	147
Technique	148
Complications	151
CHAPTER 11	
JAWLINE AND CHIN	154
Anatomy and aging	156
Pretreatment evaluation	160
Technique	161
Chin	162
Perpendicular technique	163
Fan technique	163
Complications	164
Perpendicular needle technique - Treatment of the chin	165
Needle technique - Treatment of the jawline	166
Fan technique with needle - Treatment of the chin	170
CHAPTER 12	
THE LIPS	173
The lips	174
Aging of the lips	177
Pretreatment evaluation	179
Technique	181
Correction of the cutaneous lip	181
Correction of the vermilion	182
Side effects and complications	185
